SUMMARY

Highly skilled Software Developer with a proven track record of driving innovation and optimizing performance. Proficient in Python and Sanic framework, with hands-on experience in back-end development, currently excelling as a Software Developer and Product Support Engineer at Fynd. Extensively engaged in back-end development, leveraging technologies like Kafka, Docker, and Kubernetes to enhance system efficiency. Proficient in automating processes using shell scripts and Node-RED to maximize productivity. Proactively utilize monitoring tools such as AWS cloudwatch, Grafana, Coralogix, New Relic, Sentry and Tenable to identify and resolve production issues promptly. Seeking new opportunities to apply my software development expertise and drive impactful solutions

PROFESSIONAL EXPERIENCE

Product Support Engineer   04/2022 - Present

Fynd   Mumbai

- Provide comprehensive technical support during order processing for major marketplaces (Amazon, Myntra, Flipkart).
- Spearhead backend development efforts in Python, focusing on optimizing performance and enhancing order processing logic.
- Collaborate with cross-functional teams to fix bugs in production pipelines, ensuring smooth and error-free operations.
- Utilize Kafka, Docker, and Kubernetes to scale and enhance the efficiency of order processing systems.
- Automate critical processes using shell scripts and Node-RED, resulting in significant time and resource savings.
- Proactively monitor production systems with Coralogix, New Relic, and Tenable to detect and resolve advanced issues promptly.
- Actively contribute to the development and maintenance of various microservices to ensure seamless integration.
- Upcoming Role: Software Development Engineer Level 1 (SDE-1), Fynd

Python Developer   01/2022 - 04/2022

Shivila Technologies   Kolkata

- Developed an office communication management software, similar to Slack, using Django.
- Gained valuable expertise in software development, including technologies like WebRTC, APIs, databases, and ORMs.

EDUCATION

Masters in Electronic Science   03/2017 - 08/2019

University of Calcutta, Kolkata   Kolkata

Bachelor of Science, Electronics Science   02/2014 - 02/2017

#### West Bengal State University   Kolkkata

PROJECTS

MockingBird

Location

mock any API dynamically

- This Project helped my fellow developers to test out their codes in testing environments
